## CLEAN OUR TOWN FOR BETTER MORNING

One of many ecology actions that are made in our town is THE CLEANING OF STRUMICA. This action started on March 21, 2007 and it successfully finished on the same date, but after a year. During this action were cleaned a lot of public places, streets, parks, institutions' yards, rivers' canals, zones around the city and other "black points". There were also planted a lot of trees, flowers and other green plants in the town. In this action main participants were the citizens of our town, but there also participated: the ecology association "Planetum", the public company for cleaning "Komunalec", the water's industry organization "Strumichki Sliv", the company for green zones "Belasica", all schools in Strumica and of course the Municipality of Strumica. When this action started, a lot of green T-shirts were given to the people who wanted to participate, for advertising the action. And every day there were "green people" around the town who were making some eco work. One day we also participated in this action. Every student of our school was part of it and then the next morning we had cleaner school. With this action, we (the citizens of Strumica) made our town to be the cleanest town in our country and that was awarded from the Ministry for environment of Macedonia. Only a year was necessary to make one town to be the cleanest. Will we have all country clean if we clean every year??? YES... And if we start now, will we have all Earth clean??? Of course YES. So, let's start do it for better morning for us. Now the action will be called THE CLEANING OF EARTH. ☺

Strumica is the cleanest town located in the south-east part of our country, Macedonia. There are a lot of fountains, palm trees, flower gardens and of course the biggest park which takes our breath. Because of all that the municipality of Strumica has won the award "The best municipality in ecology" that is given from the Ministry for environment of Macedonia. Strumica has deserved the epithet the town of ecology because our municipality has made a lot of ecology actions like: The day of tree, Cleaning our river, The flowers under the King's tower again, Small parks, The cleaning of Strumica and others.
